Riddhi Patel

9328312048 | riddhisanjaykumarpatel@gmail.com | Ahmedabad, India

Portfolio Website :- portfolio-gamma-blond-2sqhaqeg1p.vercel.app

Professional Summary

Motivated and detail-oriented **Full-Stack Developer and AI/ML Enthusiast** currently pursuing an **Integrated Bachelor of Computer Applications & Information Technology**. Gaining hands-on industry experience through a **MERN Stack internship**, developing scalable, responsive, and user-centric web applications. Proficient in **MongoDB, Express.js, React.js, and Node.js**, with a strong foundation in **Artificial Intelligence, Machine Learning, Data Preprocessing, Model Development, and Predictive Analytics**. Experienced in implementing machine learning algorithms and integrating intelligent solutions into modern applications. Passionate about leveraging technology to solve real-world problems through innovative software development, efficient system design, and continuous learning.

Technical Skills

Programming Languages:
JavaScript, TypeScript, Python, SQL, HTML5, CSS3

Full-Stack Development:
React.js, Node.js, Express.js, MongoDB, MySQL, Redux Toolkit, RESTful APIs **Artificial**

Intelligence & Machine Learning:

Machine Learning, Deep Learning, Supervised & Unsupervised Learning, Scikit-learn, Pandas, NumPy, SciPy, Data Preprocessing, Feature Engineering, Model Evaluation

Tools & Technologies:
Git, GitHub, GitLab, OpenAI API, Power BI, Tailwind CSS, VS Code, Postman **Core**

Competencies:

Data Structures & Algorithms, Object-Oriented Programming (OOP), Database Management Systems (DBMS), Software Development Lifecycle (SDLC), Problem Solving, Version Control, API Integration

Education

GU University

Al
In

*BSC Computer science and information Technology (**8.0 CGPA**)*

Projects

Full Stack Developer Project

Smart Notebook System:-

Description: - Developed a cloud-based digital notebook platform allowing users to create, store, and manage notes efficiently Deployment.

Role: Full Stack Developer

Github Link:- https://github.com/Riddhi2704/smart_system_notebook.git
Deployment Link:- https://smart-system-notebook.vercel.app/

Inventory Management System (IMS) :-

Description: Designing a comprehensive system featuring role-based access control for Admin, Manager, and Staff roles.

Key Features: Developed multi-functional dashboards tailored to specific user permissions and system requirements.

Technologies Used: MERN Stack (MongoDB, Express.js, React.js, Node.js)

Github Link :- https://github.com/Riddhi2704/Inventory_management_sysytem.git

Hospital Management System:-

Description: Built a full-stack solution to streamline hospital operations, including patient records and staff management.

Technologies Used: MERN Stack.

Github Link :- https://github.com/Riddhi2704/Online_Appoinment_system.git

AI/ML Project:-

Customer Classification using KNN

Description: Implemented a machine learning model to classify customers based on behavioural data using the K-Nearest Neighbours (KNN) algorithm**.**

Focus: Data cleaning, feature scaling, and model accuracy optimization**.**

Technologies: Python, Scikit-learn, Pandas, NumPy, MERN Stack

Github Link :- https://github.com/Riddhi2704/knn_customer_classification_final.git

Loan Approval Prediction

Description: Developed a machine learning model to predict loan approval eligibility based on applicant financial and demographic data. Performed data preprocessing, feature engineering, handling missing values, and model evaluation and implemented classification algorithms to improve prediction accuracy and support decision-making.

Technologies: Python, Scikit-learn, Pandas, NumPy, streamlit

Github Link -https://github.com/Riddhi2704/Loan_Approval_Predictor

Student Performance Prediction

Description:-Built a predictive analytics model to estimate student academic performance using attendance, study habits, and assessment scores. Conducted data cleaning, feature selection, and exploratory data analysis (EDA).Applied machine learning algorithms to identify factors influencing student success.Generated insights to help educators improve student outcomes and academic planning.

Technologies: Python, Scikit-learn, Pandas, NumPy

Github Link:- https://github.com/Riddhi2704/student_performer_predictor.git

Sales Forecasting Prediction:-

Description:- Developed a sales forecasting system to predict future sales trends using historical sales data. Performed data preprocessing, trend analysis, and feature engineering for accurate forecasting.Implemented predictive models and visualized business insights through interactive dashboards.Enabled data-driven decision-making by providing sales forecasts and performance analytics.

Technologies: Python, Machine Learning, MERN Stack, Pandas, NumPy

Github id :- https://github.com/Riddhi2704/sales_forecasting_model.git

Experience: -

Full Stack Developer Intern (Remote)

Company Name:-**sysslan.com** | **May 2026-July 2026 (1 Month)**

Worked on web development projects. Assisted in software design and debugging. Collaborated with team members on development tasks. Gained hands-on experience in full-stack development.

Full Stack Developer Intern (WFO)

Destiny Solution Private Limited | Ahemedabad,Gujarat

- Develop responsive web applications using React.js, HTML, CSS, and JavaScript.
- Integrate frontend components with backend APIs and databases.
- Write clean, reusable code and debug application issues.
- Collaborate with the development team to implement features and improve application functionality.
- Use Git and GitHub for version control.
